### DETAILED ACTION

Claims 1-18 are pending.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,650,156 from the IDS filed 4/13/2004) in view of Remington's Pharmaceutical Sciences, 18<sup>th</sup> ed., 1990, pages 956-971.

'156 teaches a drug delivery system employing hemoglobin microsphere. Such delivery system is suitable for the delivery of steroidal anti-inflammatory agents such as hydrocortisone when they are dissolved in biocompatible oil such as safflower oil (See col. 26, lines 6-15 and 25-27).

'156 does not teach the delivery of hydrocortisone butyrate.

Remington teaches hydrocortisone butyrate as anti-inflammatory agent (See 970, col. 1). Remington also teaches hydrocortisone as insoluble in water (See page 965, col. 1). Remington also teaches esterification of hydrophobic organic acid decreases solubility (See page 958, col. 2, second paragraph).

It would have been obvious to one of ordinary skill in the art at the time of invention to deliver hydrocortisone butyrate using the delivery system of '156.

Art Unit: 1617

One of ordinary skill in the art would have been motivated to deliver hydrocortisone butyrate using the delivery system of '156 since the solubility of hydrocortisone butyrate is an ester of hydrocortisone. It would be reasonably expected that hydrocortisone butyrate is even less soluble than hydrocortisone itself and be soluble in biocompatible oil such as those taught in '156. Formulating the ester of hydrocortisone including hydrocortisone butyrate in the delivery system of '156 since substituting a compound with the ester of that same compound is obvious. The stabilizing steps recited in the claims are therefore suggested in the cited prior art. And the cited prior art render the herein claims obvious.
